#### COURSE INFORMATION

##### Course Description

This course teaches the fundamentals of electricity and electrical theory as it applies to electrical metering. Participants discuss AMI metering and gain the knowledge and skills required to safely design, construct, install and troubleshoot electrical metering systems, ranging from single-phase, self-contained installations to three-phase instrument metering installations. The course also covers AMR and primary metering operations. In this course, participants complete problem-solving exercises, hands-on meter connections and troubleshooting exercises through classroom and field instruction.

##### Each participant should bring

- Hardhat
- Voltmeter
- Safety glasses
- Long-sleeved ARC-rated shirts
- Rubber gloves
- Hand tools

##### Course Prerequisites

Participant should have at least one year of line crew construction, maintenance and/or service crew experience. The course is not recommended for meter technicians.
