COURSE INFORMATION

Course Description

Underground Cable and Equipment Installation

This course teaches how to properly install an underground system from the riser to the secondary installation. The class is designed for employees in the electric utility industry who install underground electric utilities. Students gain extensive hands-on experience during training exercises with experienced craftsmen, who provide one-on-one training. Students learn proper cable installation and preparation, and how to install single- and three-phase transformers, risers, secondary pedestals, elbows and splices.

Underground Troubleshooting and Fault Locating

This course teaches how to safely and properly perform switching, grounding and fault-locating procedures, and locate cable routes in a safe manner. This class is designed for employees who are involved in the operation of an underground system. Through hands-on training exercises based on real-world situations, students learn the safest ways to troubleshoot, isolate and ground an underground electric installation.

Each participant should bring

- Hardhat
- Safety glasses
- Long-sleeved shirts
- Safety-toe footwear
- Work gloves
- Hand tools
- Cable preparation tools
- Rain gear
- Rubber gloves and sleeves
- Stripping tools (Installation school only)

Course Prerequisites

The participant should have experience as a groundman or be an apprentice lineman.

Course Schedule

8 a.m., Tuesday, August 18–noon, Friday, August 21
Guest instructors' meeting 8 a.m., Tuesday, August 18

Class Limit

30 students

Continuing Education Units

32 hours (3.20 CEUs)
