Designing Rates for Electric Vehicle Charging

INSTRUCTOR: MIKE SEARCY AND JOSH DAN, GUERNSEY

THURSDAY, APRIL 16, 10–11 A.M.
Register by April 9

No one knows how quickly electric vehicles will penetrate the Texas vehicle market or how deeply they will penetrate rural areas. Rather than waiting until EV chargers become an issue, many co-ops are considering proactive rate design and load control options. In particular, since EV chargers can have quite high capacity costs with relatively low energy usage, many co-ops see them as “low hanging fruit” for load management.

Participants will learn:
• Impact on revenues
• Power and system costs
• Potential margins from EV chargers
• Rate options that send appropriate pricing signals to members

Webinar Registration Fees
Member Registration: $99 per person
Group Rate: $295 per cooperative (unlimited attendees)
Nonmember Registration: $200 per person
Note: A $50 charge will be applied per student for cancellations after the “register by” date listed above.
