Storm Hardening: Best Practices

INSTRUCTOR: HI-LINE ENGINEERING

DECEMBER 8, 10–11:30 A.M.
Register by December 1

The industry is moving from reliability to resiliency where resiliency defines how quickly a system recovers from a major event. Although storm hardening of the entire system may not be practical, focused storm hardening for key structures is both effective and economical. This webinar will present best practices used throughout the industry to harden key structures or segments of line which will aide in faster restoration of the system. The webinar will discuss best practices for different types of events (flood, wind, ice, etc.) and how these practices create cost effective means for resiliency.

Participants learn:
• Best practices for system hardening
• Define focused storm hardening
• Hardening based on event

Webinar Registration Fees
Member Registration: $99 per person
Group Rate: $295 per cooperative (unlimited attendees)
Nonmember Registration: $200 per person

Note: A $50 charge will be applied per student for cancellations after the “register by” date listed above.
